Anytime
Continuous Glucose Monitoring System

CT15/CT3 Series Quick Start Guide

Open both boxes and make sure that you have all of the parts shown below:

| Sensor (probe) | Transmitter | Charging base | Charging cable |

① Preparations

Step 1 Download the software

- Turn on the mobile Bluetooth
- Download the 'Yuwell Anytime' app from your usual app store
- Follow the prompt to log in

登录
手机号码

① Turn on Bluetooth　　② Login

Step 2 Charge the transmitter

- Place the transmitter into the charging base for charging. The white indicator will flash (indicating charging).
- Wait for the indicator to turn blue (indicating full charging) and remove the transmitter.

Remove the transmitter after full charging

Indicator
White indicator flashing: charging
Blue indicator: fully charged

② Connect the device
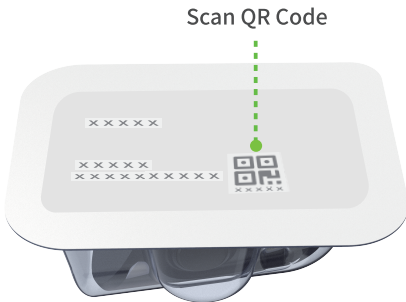

Step 1　Connect to the transmitter

- Access the **'connect transmitter'** page on the app.
Select the SN corresponding to the transmitter to complete the connection.
Connect the sensor by scanning the QR code on the housing of the sensor.

Step 2 Connect to the sensor

- On the App page, scan the QR code on the plastic housing of sensor and enter the initialization countdown mode.

Scan QR Code

③ Implant the sensor

Step 1

- Choose either an upper arm or abdominal insertion site. If an abdominal site is chosen, place the sensor within the dashed areas below.
- Disinfect with alcohol prep pad and air dry it before the next step.

Below ribs

To wear at the upper arm: please select the rear of upper arm side.

Step 2　Do not unlock before applying to the skin

- Tear off two protective films from the orange area.

Tear off protective films
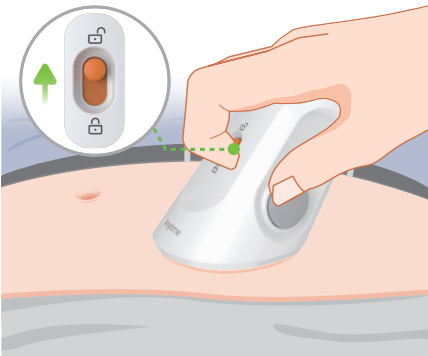

Step 3　Do not unlock before applying to the skin

- Place the sensor tightly against the implantation site.

Horizontal placement

Step 4

- Slide the safety lock to unlock.

Step 5

- Press the buttons on two sides at the same time until a "click" sound is heard.

Step 6

- Slowly remove the insertion device part of the sensor to complete the implantation.

④ Install the transmitter

Step 1 ★ Important steps

- Snap the transmitter onto the sensor according to the angle shown in the following figure.

Correct placement method (buckled obliquely) ✓

**Wrong placement method (aligned and buckled)** ✗

Step 2

- Firmly pinch the transmitter and sensor as shown in the following figure until a "click" sound is heard.

⚠ Push the transmitter in reverse to verify it is locked.

① ② ③

⑤ Software interface

- The App starts displaying the blood glucose value after initialisation ends.

  The initialisation takes **60** minutes
